ada developers academy

VOLUNTEER PROGRAM

Why volunteer at Ada?

The Ada Volunteer Program creates opportunities for tech professionals to use their skills to support underrepresented new developers. Our volunteers are critical community members who bring their expertise to our school in a range of roles that contribute directly to student success. You can be a part of helping diversify the face of tech and give back to the community.

ADA BY THE NUMBERS:

+10k HOURS IN 2022

337 VOLUNTEERS IN 2022

92 TUTORS IN 2022

Time Commitments:

Tutors commit to **1 hour per week** and are matched with one student for the entirety of the classroom phase.

TAs commit to **2 hours per week** and also help out in the #study-hall channel in Slack.

Industry Mentors commit to **2 hours per month**, meeting virtually or in-person.

Mock Interviewers must have technical experience and **can opt-in** to lead one-hour interview sessions as they are comfortable.

Roles:

Tutor
Tutors work individually with students who would benefit from individualized support with the curriculum.

TA (Teaching Assistant)
TAs host drop in office hours open to any students who would like help with projects or reviewing concepts.

Industry Mentors
Mentors meet with students to give insight into tech culture, social support, networking tips and more.

Mock Interviewers
Help students and interns practice their interview skills by simulating a technical whiteboard interview in a low-stakes setting.
